FOOT-NOTE.—No. 15 has right of track against No. 16 to Ager until 2.13 P. M.

SPECIAL RULES.

Dunsmuir will be terminal station for all trains.

All trains must procure either orders or clearance cards before leaving their terminal stations.

Trains or light engines between Snowdon and Ashland must reduce speed to safe limit crossing long bridges and trestles.

When trains of same class meet on heavy grade where there is a derailing switch in the passing track, the train going up grade will take siding.

Freight trains will carry no passengers but employees going to or from their work, except as provided in Rule 242.

Nos. 17 and 18 will stop on signal at Buckeye and Anderson Brickyard.

Beside those indicated on the time table there are water tanks three-quarters of a mile east of Cantara, one mile east of Coles, and one mile west of Siskiyou.

Registering stations: Red Bluff, Redding, Dunsmuir, Hornbrook, Ashland. Standard clocks are located at these places.

In pulling out of stations, brakemen must watch wheels closely to see that brakes are fully released, and will immediately signal engineers to stop if wheels are found sliding. Engineers must keep a sharp lookout for such signals, as per Rule 278. Each brakeman will be held responsible for any wheels slid flat under the part of the train in his charge. Conductors in reporting flat wheels will give name of brakeman in charge.

See Rule 84.—All west-bound trains have the absolute right of track over all trains of the same class running in the opposite direction.
